About Us

PRG International Electricals Private Limited, a flagship company of PRG Group was **set up in the year 1982** and is one of the leading manufacturers of Electrical Stampings, Laminations, Wound Stators, Die-Cast Rotors and casted Fan Covers. The company is manufacturing approx. 35,000 tons of Laminations per annum, and the capacity is being increased steadily.

An **ISO 9001:2015 & ISO 14001:2015 certified** company, PRG has the distinction being one of the Lamination manufacturers in India. Apart from the necessary infrastructure, facilities and sophisticated machinery including 7 Schuler Notching Machines and several automated power presses, the company has a well-equipped Tool Room and testing arrangements that take care of all captive tool requirements. We apply special focus on the design and manufacture of the products, which is a major strength of the company.

The common thread that connects all the reputed companies with the Group is the attitude towards professional management and the dedication to deliver top notch products supported by skilled workers, which has helped the company to maintain its leadership in the industry.

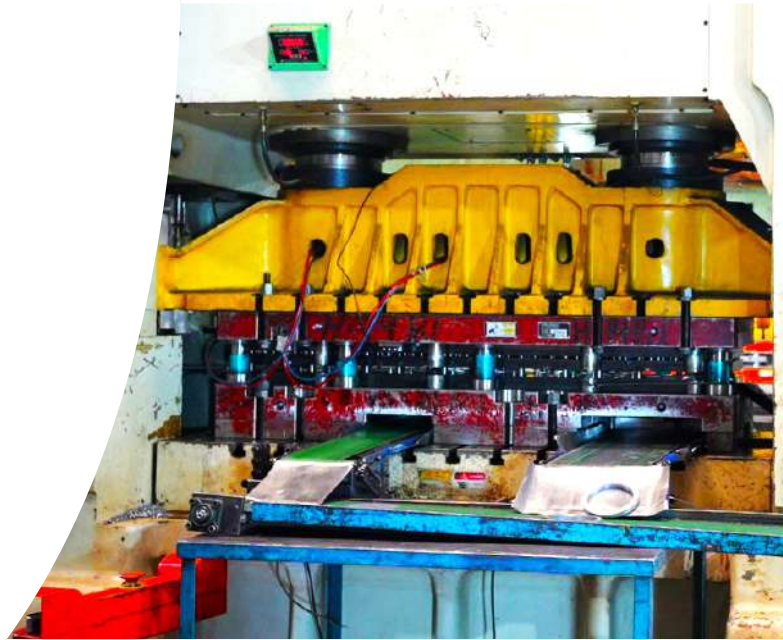

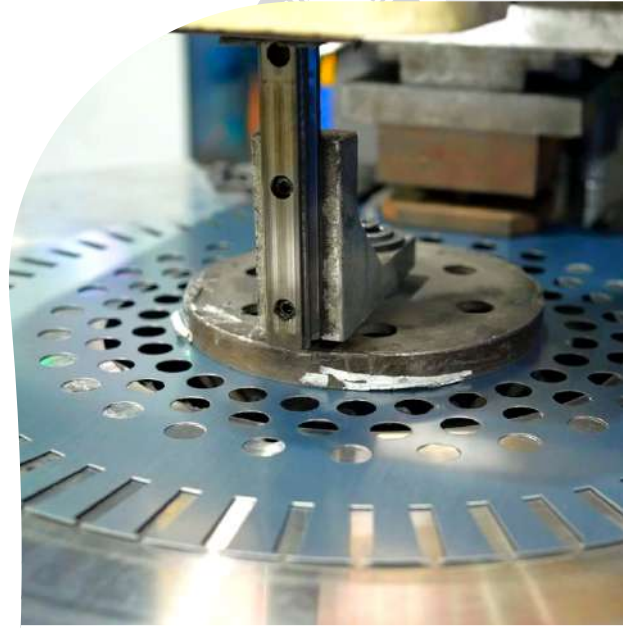

Hon'ble Late Shri PC Goyal
(Founder of PRG International)

Mr. Rajeev Goyal
(Managing Director)

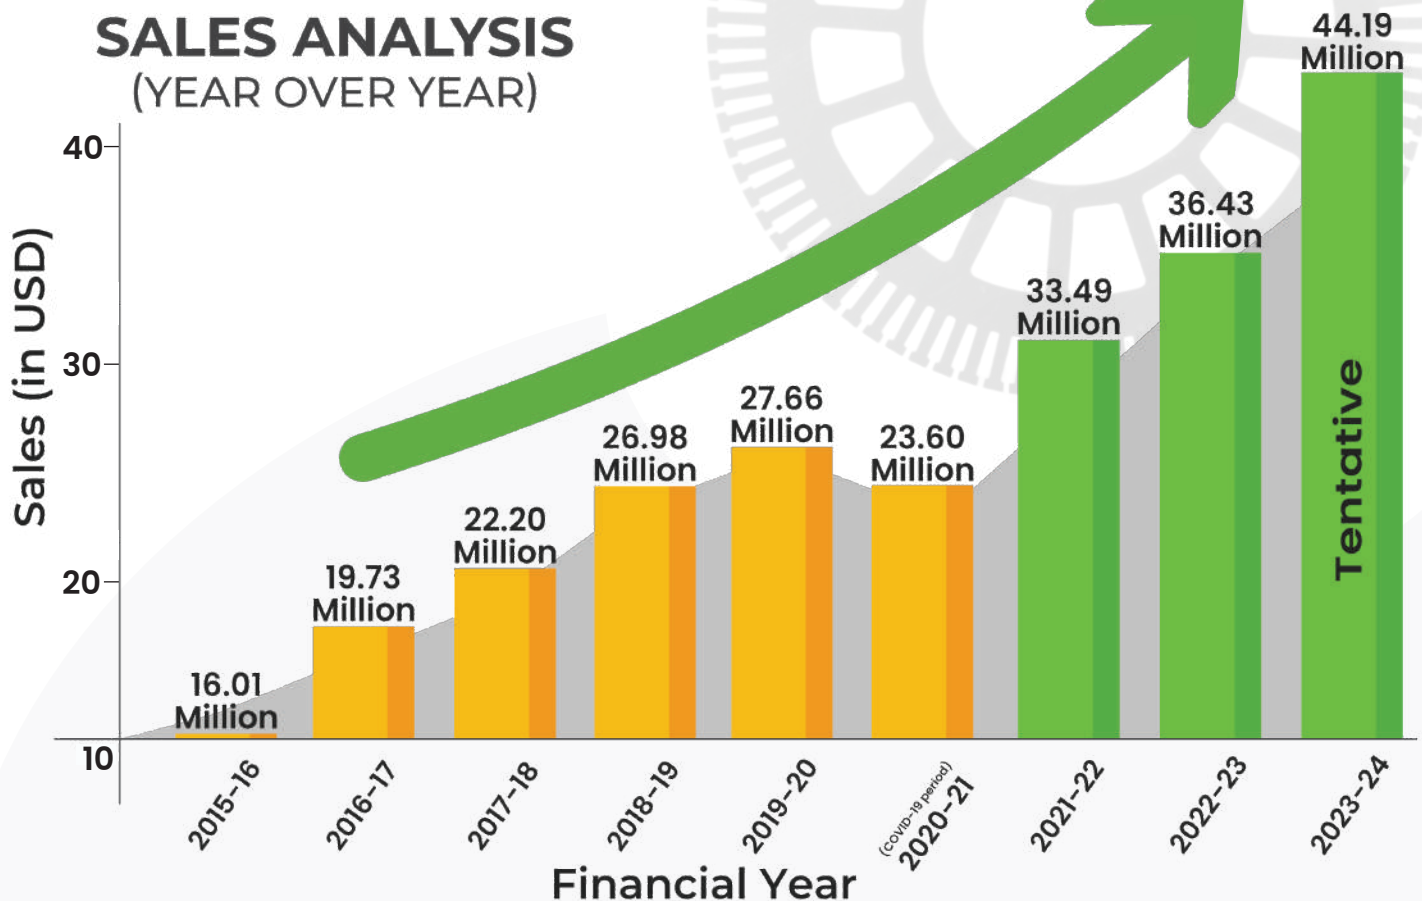

BUSINESS GROWTH

Our products are popular for their high quality, meticulous workmanship, flawless performance and long durability.

With continuous effort the company has, over the years, achieved tremendous growth and become a giant organization, besides being the first choice of all quality- conscious customers.

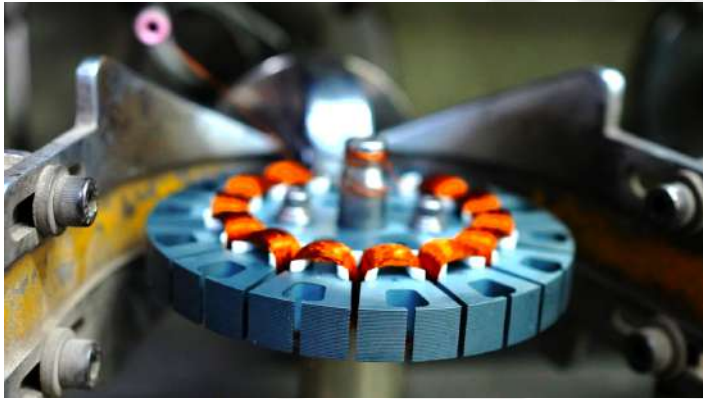

Forward thinking and technical background of the management supported by a team of dynamic & experienced well-qualified professionals and skilled workers have helped the company to maintain its leadership in the industry.

CERTIFICATIONS & HONOURS

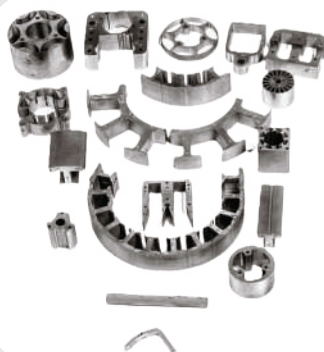

WIDE RANGE OF PRODUCTS

PRG is a pioneer in growth and has been continuously adding new lines to assist the customers.

Our Company is one of the largest manufacturers of Stamping and Laminations in India, producing and delivering a large variety of stampings and laminations for a multitude of electrical motors (HT & LT), pumps, alternators, transformers, ceiling fans and home appliances.

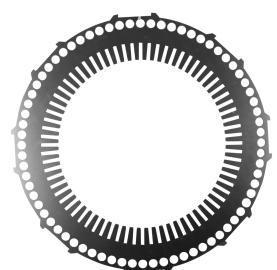

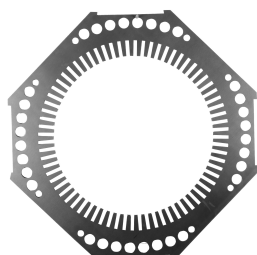

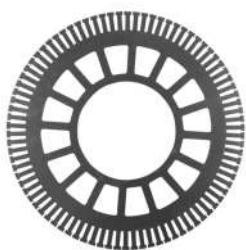

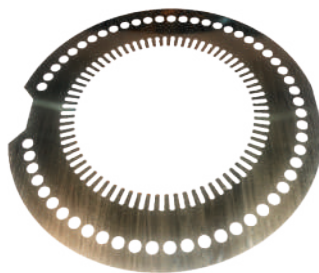

We also support our customers with ancillary needs, such as fan covers, stator windings and not just limited to that.

The company is manufacturing auto-stacked rotors and stators upto **250 frame size and loose lamination upto 630 frame size.**

Complete flexibility is offered for cleating/welding of stators as required by the customers and we also **manufacture aluminium die cast rotors upto 355 frame size**

Tools are readily available at our plant for various types of stamping lamination designs & apart from that tools are continuously developed to meet specific requirements as per customers' demand and drawings.

QUALITY ASSURANCE

PRG International is an **ISO 9001:2015 and ISO 14001:2015 certified** organisation, engaged in the manufacturing and supply of high quality products. The company firmly believes in quality and has vastly invested in sophisticated machinery & equipment, qualified manpower and quality raw material purchases in accordance with international standards. Thus all the products are manufactured in strict conformity with the parameters laid down in ISO specifications and as per customers' requirements.

Quality maintenance is an ongoing process at our end and we ensure that no aspect of it is ever compromised.

INNOVATIVE TECHNOLOGY & ROBUST INFRASTRUCTURE

We have the distinction of being one of the first lamination manufacturers in India, having installed advanced machinery in order to meet new and evolving technological & industrial developments for greater production efficiency & accuracy.

Further, a modern tool room that takes care of all captive tool requirements in the manufacturing of stamping and laminations is a major strength of the company.

With the diligent efforts of our technical team, the company has developed numerous high speed progressive tools with the running speed upto 400 strokes per minute to ensure that the customers get fast delivery of the products at low prices.

RESEARCH & DEVELOPMENT

We have our own Research & Development Centre with the following objectives:-

- To develop new processes in-house, which comply with customers' specific needs.
- To develop new products based on upcoming technologies to upgrade the quality level.
- Persistent improvement in the products through innovation.
- To design and develop products, incorporating all safety standards at design and development stage itself.

Besides, R&D is an ongoing process at PRG, keeping pace with the latest developments and market trends

R&D CAPABILITY

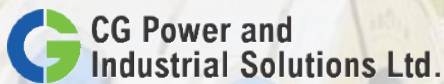

- Equipped with Auto CAD & Solid works for drafting and 3D Modeling.
- Designing, Simulation and Validation of Fixtures.
- Equipped with Mastercam & CADEM software for 3D CNC Programming.
- 3D Scanning facility for product designing.
- 3D Printing for Rapid Prototyping available.
